

Order of Labor Glory, 3rd class, Type 2, #90280, circa mid- to late-1970s.

Silver gilt, enamels; measures 47.0 mm in height (incl. eyelet), 41.0 mm in width; weighs 35.3 g not including the suspension and connecting link. Note the five-digit serial number, uncommonly low for a Type 2.

Excellent condition. The enamel is perfect, free of any wear visible even under a 10x magnification. There is very attractive patina to silver while the gold plating on the letters is still clearly visible. Comes on original two-layer aluminum suspension. The old ribbon shows minor amount of discoloration near the bottom but is otherwise nicely preserved and adds character to the award. The connecting link appears to be original; its ends are joined with solder in the manner characteristic of the Soviet mint.

Item# 37581
