

Veteran's Badge in Commemoration of the 50th Anniversary of the Air Force Engineering Service, 1966 issue.

In aluminum, "cold" enamels and lacquer, far larger and better quality than a typical veteran's badge. Measures 52.3 mm in height (over 2"), 50.0 mm in width, almost 3 mm thick and the bottom. No maker marks, but the badge is similar in construction to some of the contemporary, late 1960's badges of the Pobeda Factory in Moscow. Overall, a very impressive and unusual piece!

The badge is in excellent condition. The enamels and finish are practically pristine. There is a scribbled numeral "1992" on the reverse, possibly a memorable date put there by the original owner. The screw post is of full length, approx. 9.5 mm, and includes original unmarked screw plate of characteristically crude construction.

Please note, penny in our photo is for size reference.
