

Ready for Labor and Defense badge, variation by the Trudovoi Gravyor (Laborer Engraver) Workshop #K 257997, 1936-1940 issue.

Nickel-plated brass, enamels; medallion measures 31.8 mm wide. The suspension has inscription "USSR". The reverse of the pendant has pin attachment, raised lettering "Trud-Gravyor Workshop" in the center and stamped serial number #K 257997 near the bottom.

In excellent overall condition. The enamel is essentially perfect: free of noticeable wear, flaking or chips, and shows very attractive luster. There are just a couple of microscopic contact marks completely unnoticeable to the naked eye. The raised details and silver plating are likewise perfect. The pin is fully functional. The screw post is full length, approx. 10 mm, and includes scarce original screw plate maker-marked "Trud-Gravyor Workshop, Leningrad".

/Avers 8, p. 637, fig. 3361.a/.
