

Medal for the Capture of Vienna, Variation 3, 1960s-80s.

In brass, 32.0 mm wide; weighs 16.2 g not including the suspension and connecting link. In excellent, near mint condition. The medal is completely free of even the tiniest contact marks; there are literally no signs of wear visible to the naked eye. Most of the original "gilt" mint luster is still present and bright on both sides. Comes on original brass suspension with perfectly preserved old ribbon.

For unknown reasons, Variation 3 of Medal for the Capture of Vienna is far scarcer than either Var. 1 or 2 of the same award. It also happens to be one of the hardest to find among the "Voenkomat" series of Soviet WW2 campaign medals.
