

Folding compact theater binoculars, circa 1970s-80s.

Manufactured at a factory in the city of Minsk, Belorussia.

Case measures approx. 4 1/4" x 2 1/2" x 3/4". In chromed steel, side panels are laminated with imitation woodgrain paper. The focusing wheel is made of hard white plastic.

In excellent condition in terms of state of the metallic parts, side panel lamination and lenses. Mechanically sound and in perfect working condition. Please note that it takes more than just a little pressure to fold the oculars inside the case when you want to close it.

This is a fine memento from the almost gone era of live performances.

Please note that the coin in our photo is for size reference.
