

Dyatkov Crystal, photo album with informative essays on the history of the factory since its foundation in 1790, different techniques and types of its production lines, and the artists working at the factory at the time of this 1980 publication.

Measures 8 1/2"x 6 1/2", 128 pp., hardcover. Russian text. Printed on heavy-stock semi-gloss coated paper. Published by the Planeta Publishers, Moscow. Circulation 20,000 copies.

In good condition. The covering on the hardcover board shows very minor cracks and rips at the top and bottom of the spine as well as insignificant corner bumps. A number of the internal pages appear to have been exposed to minor water damage resulting in slight crinkling of the paper at the top of these pages. This bears no significant impact on the quality of the photo illustrations or text. The back cover features an inventory tag of a Russian bookstore.

Please note that the pen in our photo is for size reference.
