

German Small Arms Munitions Box, circa 1943-1944.

Measures 7 3/8" x 11 5/8" x 20 1/8" . In wood with steel corners; one almost furniture quality recessed steel hasp (with a functioning internal spring). Lid opens horizontally. Stenciled "3" and "Kohlen" at one end.

Very good to excellent condition. Normal wear. One narrow space in the bottom where the boards have slightly separated. Steel components all show rust but still function properly. One of the few occasions where we've seen a spring-loaded recessed latch that still works without coaxing.
