

### Early Pre-WW2 Photo of Recent Graduate of the Leningrad Air Force Higher Technical School, 1927.

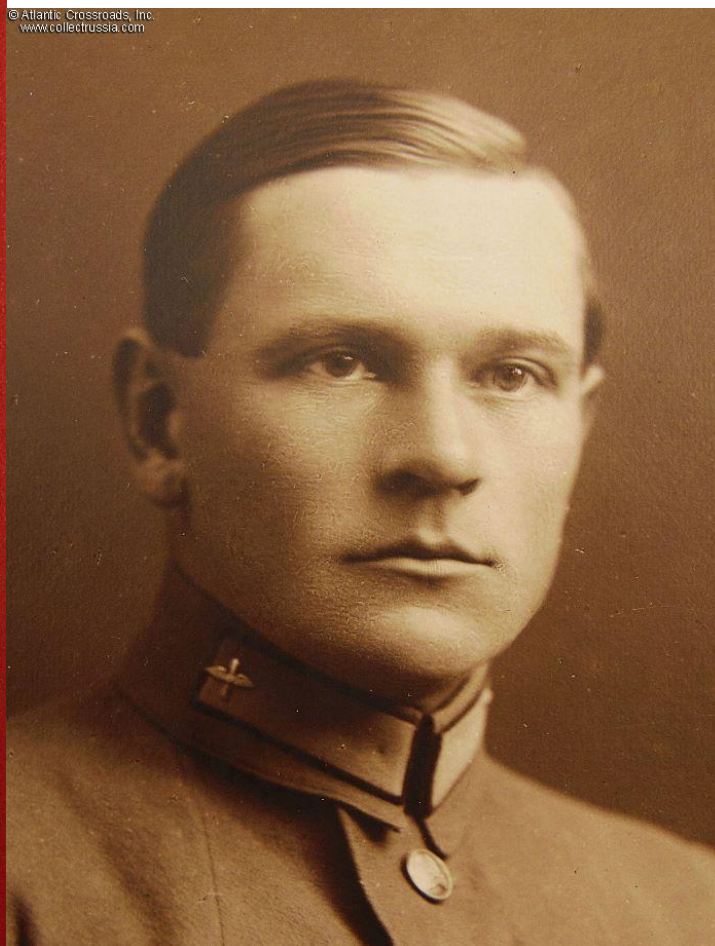

Measures 3 1/2" x 5 1/2", printed on matte photo paper. The aviator is wearing a French-style tunic with Air Force personnel sleeve wings patch and insignia on the collar tabs. No rank insignia means that the photo was taken before he was commissioned as an Air Force officer. The handwritten inscription on the verso reads "April 1927. Graduation from the Air Force Higher Technical School, Leningrad."

In excellent condition. The image is in very sharp focus; the minuscule wear to the corners and edges is barely visible and not detractive. The inscription on the verso is crisp and clear, not faded, and so is the photographer's ink stamp.

Please note that the penny in our photo is for size reference.
