

Official Government Announcement of the Death of Lenin, 22 January 1924.

Single page 13" x 17 1/2", front only. Printed in Petrograd, circulation 50,000 copies. The announcement contains a brief description of the last hours of Lenin's life and his health status, the official cause of death conclusion signed by five doctors and the People's Commissar of Healthcare, and the resolution of the Presidium of the Central Executive Committee to form a commission responsible for Lenin's funeral.

In very good to excellent condition. The minor wear and slight discoloration along the edges are not too obvious against the large area of the news sheet. The text is crisp, clear, and perfectly legible. The fold lines are visible but completely flattened out. The paper feels a little frail but not brittle.

Please note that the pen in our photo is for size reference.
